F1 WORLD CHAMPIONS

More than 65 years of innovation in the world's most demanding sport

It Takes A Lot to Finish First

To get there, you need an amazing combination of cutting-edge technology, seamless teamwork, proven skill, dedication and unwavering nerve. It also takes a good deal of precaution. As a company of first, Bell has never stopped the pursuit of serious head protection through innovation and a focus on the future. We were the first company to be Snell certified, introduce an energy absorbing liner system, build a full-face helmet, fire retardant helmet, aerodynamic helmet, anti-fog shield and homologate an FIA 8860 "super helmet". That same forward thinking defines everything we do and is exhibited in every high-performance racing helmet we build. Delivering the ultimate in protection, innovation, technology and reliability, it's no wonder why more champions have proudly worn Bell Helmets than any other brand.

Time Tested, Champions Trusted

For over 65 years, our commitment to innovative design and progressive approach to safety has defined Bell Racing. That same attention to detail continues today throughout our entire line of products making each Bell helmet unique and worthy of being worn by the world's best drivers. The latest generation of Bell Racing helmets offer forward-thinking design, leading-edge technology, superior engineering, outstanding comfort and fit, enhanced ventilation and industry leading features with the latest material innovations and manufacturing techniques to create the most advanced line of racing helmets available in the world today.

At Bell, we know racing and we know it is a serious business. For CIRCUIT racing, we offer a complete line of FULL FACE helmets, from the Advanced HP77 chosen by a majority of Formula One drivers to the GT5 Sport, the helmet of choice for occasional racers.

Some models are declined in various versions:

- The Advanced Series helmets (HP) use ultra-lightweight aerospace grade carbon shell combined with a high-performance multi-density energy absorbing liner system delivering the ultimate protection. They are the pinnacle of technology and innovation, representing the best of Bell.
- The Carbon Series helmets feature a lightweight carbon shell and deliver the best performance to value ratio in motorsport.
- The Pro Series helmets, with their lightweight composite shell, are designed for drivers at all levels of racing who expect industry-leading performance, professional features and the latest engineering advances.
- The Sport Series helmets are intended for amateur racers who do not want to compromise on safety and comfort.

FULL FACE HELMETS
CIRCUIT

The HP77 is based on Bell's highly successful and multiple F1 World Champion proven HP7 design. Chosen by a majority of top professional open cockpit racers, the HP77 provides the most advanced protection, featuring a very narrow eyepoint on top of which high strength ballistic materials have been incorporated. Following a long tradition of innovation, the HP77 was the first helmet to meet the latest FIA8860-2018-ABP standard. It is renowned for its lightweight, aerodynamic qualities, superior cooling and amazing defogging system for the intense demands of open-cockpit forms of racing in all types of weather. The HP77 is homologated to the FIA8860-2018 ABP standard, the most rigorous sport helmet standard on the planet, designed for professional formula racers competing at the highest levels of the sport.

- Full face helmet featuring High-strength and High-modulus carbon fibres ultra-lightweight FIA8860-2018 ABP shell
- Very narrow eyepoint
- Frontal area with integrated ballistic materials for added protection from flying debris
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) shield for anti-fog control and superior visibility
- Powerful and effective top and chin bar ventilation system with 12 air intake and extraction channels for maximum ventilation
- Air intake system includes two part centre and low profile on sides (installed)
- Shell and shield design optimized to improve aerodynamic performance, reduce internal noise and enhance energy management capacities
- Integrated channels in face piece offering multiple options to install drink tube and communication systems
- Top spoiler, top and chin bar gurneys available separately
- Factory installed Hans anchors as original equipment
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Available with frontal chinbar hole for the introduction of the drinking tube (optional special order)
- HP helmet bag included
- Shield and pivot kit: SE077 3MM, SV(SE07)
- Interior: Dark Grey High Strength - High Comfort FR Fabric
- Alternative interior fabric colors: Tan, White, Red, Purple, Blue, Green, Neon Yellow, Pink and Orange (on special order)
- Color: Carbon, Matte finish
- Sizes: 54-55-56-57-58-59+
- Homologation: FIA8860-2018-(ABP)

SIZES: 54 TO 61+

Developed through close collaboration with leading F1 drivers and teams, the carbon fiber HP7 is aerodynamically sleek, lightweight and efficient for the intense demands of all forms of racing. Meeting FIA8860-2018 "Advanced Helmet" standard, the HP7 is also equally popular amongst professional drivers in open-cockpit cars and closed Sports cars and GT cars, thanks to its very high level of comfort. For professional drivers competing in high-speed forms of motorsports, the HP7 allows racers to take advantage of the latest technological innovations including aerospace composite materials and advanced energy absorbing liner systems.

- Full face helmet featuring High-strength and High-modulus carbon fibres ultra-lightweight FIA8860-2018 carbon shell
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) shield for anti-fog control and superior visibility
- Powerful and effective top and chin bar ventilation system with 12 air intake and extraction channels for maximum ventilation
- Air intake system includes two part centre and low profile on sides (installed)
- Shell and shield design optimized to improve aerodynamic performance, reduce internal noise and enhance energy management capacities

Incorporating technology used in our state-of-the-art HP7 Advanced Helmets, the HP6, with its modern and aggressive design, has been developed for racers in closed-car environments, featuring a wide eyeport for extended vision with an ultra-lightweight Advanced carbon shell. Its ventilation slots can be connected to various types of air intakes for external cooling systems. It can be fitted with optional earcups providing optimal noise insulation, with fully integrated radio communication kit and hydration systems (available separately or in RD version).

- Ultra-lightweight FIA8860-2018 Advanced full carbon shell
- Wide eyeport opening for optimal vision in closed cockpit cars (Shield type SE06)
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Integrated channels in face piece offering multiple options to install drinking tube, valves and radio systems
- Extraction vents to maximize cooling and air circulation
- Factory installed Hans anchors as original equipment
- Optional Top forced air intake can be installed on the left or right top side vents - available for use with and external cooling system
- Forced air kits available for aftermarket including quick lock (V10) and are fully compatible with Maglock
- HP helmet bag included
- Interior: Dark Grey High Strength - High Comfort FR Fabric
- Alternative interior fabric colors: Tan, White, Red, Purple, Blue, Green, Neon Yellow, Pink and Orange (on special order)
- Color: Carbon, Matte finish
- Sizes: 54-55-56-57-58-59-60-61-61+

HP6 RD

1140010 to 1140018

2.300,00 €

SIZES: 54 TO 61+

- Same characteristics as HP6 with fully integrated radio communication kit and hydration systems.
- ZeroNoise® noise cancelling microphone integrated in face piece
- Coil style (curly cable) with heavy duty In-Molded Male Nexus Connector (4 pins)
- RCA connector compatible with Earplug Transducers (Various types of ZeroNoise® Transducers available as accessory)
- Hydration system (drinking tube) with fast release connector
- Compatible with earcups for increased noise insulation

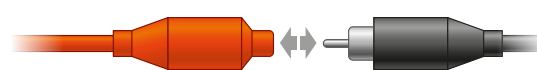

DRINKING TUBE KIT

The integrated drink tube kit includes flexible tubing, L shaped adaptor to properly position the mouth bite valve and a one-way valve for drinking systems. This allows for seamless integration without modifying the face piece or drilling holes in the helmet chin bar (bite valve and drinking system not included).

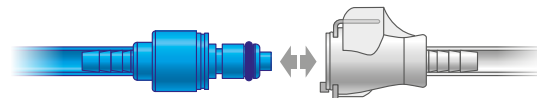

HP6 RD

• RCA connector compatible with Earplug Transducers

• 1/8 Hose Barb Valved In-Line Coupling Body fast connector

MICROPHONE KIT RCA-CINCH

Bell's 4 connector radio helmet kit features a dynamic noise cancelling microphone pre-wired and integrated into the helmet's face piece and optimized to work with industry standard radio systems. The kit includes a coil style cord and ready for use with "in-ear" transducers (ear buds) fitted with RCA-CINCH Female Connector.

ACCESSORIES AVAILABLE

Based on the innovative HP7 design and featuring an ultra-lightweight carbon shell, the RS7 Carbon provides racers with unmatched acoustic comfort, aerodynamic performance and energy absorbing capacities. The sleek, aerodynamic design features an advanced ventilation system with 14 air intake and extraction channels for maximum airflow and ventilation.

- Ultra-lightweight Premium Carbon Composite shell
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) visor for anti-fog control and superior visibility
- Powerful and effective top and chin bar ventilation system with 14 air intake and extraction channels for maximum ventilation
- Air intake system includes two-part centre and side air intakes (installed)
- Shell and shield design optimized to improve aerodynamic performance, reduce internal noise and enhance energy management capacities
- Integrated channels in face piece offer multiple options to install drink tube and radio systems
- Rear spoiler, top and chin bar gurneys available separately
- Top air attachments available separately
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Factory installed Hans anchors as original equipment

The kit includes a coil style cord and ready for use with "in-ear" transducers (ear buds) fitted with RCA-CINCH Female Connector.

The versatile GTX3 Carbon, used extensively on dirt race tracks around the globe provides industry-leading performance and is a perfect choice for racers competing in open wheel forms of motorsports, specially dirt-track forms of racing. Featuring an ultra-lightweight carbon shell, integrated rear spoiler for enhanced aerodynamic performance at higher speeds, venturi air-exchange system, and double screen anti fog (DSAF) shield, the GTX3 Carbon is ideal for dirt track and other challenging forms of racing.

- Ultra-lightweight Premium Carbon Composite shell
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) visor for anti-fog control and superior visibility
- Rear-facing side chin bar vents and air extraction vents create a venturi-effect to minimize dirt and dust entering the helmet while maximizing air exchange
- Integrated carbon look rear spoiler for enhanced aerodynamic performance
- Integrated channels in face piece offer multiple options to install drink tube and radio systems
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Factory installed Hans anchors as original equipment

Combining iconic F1 styling, versatile air-intake system, Ultra-lightweight carbon shell with leading edge aerodynamics, the GP3 Carbon is a great looking high performance helmet. Optimized for open-wheel, formula drivers, karters and other circuit racers who demand professional features, performance and comfort, the GP3 Carbon provides maximum ventilation and clear visibility for use in the most diverse and demanding racing environments.

- Full face helmet featuring ultra-lightweight Premium carbon composite shell
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) visor for anti-fog control and superior visibility
- Versatile ventilation system featuring lower front chin bar ventilation and upper air-intake vents that can be opened and closed
- Front duckbill (chin spoiler) for improved aerodynamic performance
- Integrated channels in face piece offer multiple options to install drink tube and radio systems
- Factory installed Hans anchors as original equipment
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Interior: Dark Grey High Strength - High Comfort FR Fabric
- Alternative interior fabric colors: Tan, White, Red, Purple, Blue, Green, Neon Yellow, Pink and Orange (on special order)
- Shield and pivot kit: SE03 3MM, SV(SE03/SE05)

Based on the HP7 design and featuring a lightweight carbon fiberglass composite shell, the RS7 uses an innovative shell and shield design to improve acoustic comfort, aerodynamic performance, and energy absorbing capabilities. The sleek, modern design features an advanced ventilation system with 14 air-intake and extraction channels that can be used with or without air-intake (available separately). The RS7 double screen anti-fog (DSAF) visor and rubber gasket seal ensure air, water and dust will not enter in the eyeport.

- Lightweight Premium Carbon Fiberglass Composite shell
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) visor for anti-fog control and superior visibility
- Powerful and effective top and chin bar ventilation system with 14 air intake and extraction channels for maximum ventilation
- Shell and shield design optimized to improve aerodynamic performance, reduce internal noise, and enhance energy management capacities
- Integrated channels in face piece offering multiple options to install drinking tube, valves and radio systems
- Factory installed Hans anchors as original equipment
- Air Intake, side air extractors, rear spoiler, top and chin bar gurneys available separately
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet

The GP3 combines traditional F1 styling, versatile air-intake system, double screen anti-fog (DSAF) visor and carbon-glass composite shell with leading edge aerodynamic performance. A great option for open-wheel, formula racers and karters who demand professional features, performance and comfort, the GP3 provides maximum ventilation and clear vision in even the toughest track conditions.

- Full face helmet featuring Premium carbon-glass composite shell
- Advanced multi-density, multi piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) visor for anti-fog control and superior visibility
- Versatile ventilation system featuring lower front chin bar ventilation and upper air-intake vents that can be opened and closed
- Front duckbill (chin spoiler) for improved aerodynamic performance
- Integrated channels in face piece offer multiple options to install drink tube and radio systems
- M6 terminals for FHR anchor attachment and homologated for use with approved head and neck devices
- Available with or without FHR anchors fitted as original equipment
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Shield and pivot kit: SE03 3MM, SV(SE03/SE05)
- Colors: White and Matte Black
- Sizes: S-M-L-XL
- Homologation: FIA8859-2015

Rally is one of the most challenging racing sports, putting cars and drivers through the toughest and the most varied conditions. To face all these challenges, Bell Helmets and Zeronoise, the electronic division of our group, developed a completely new line of sophisticated rally helmets with the help of top professional rally drivers and teams. Our new rally helmets deliver premium quality and high performance features such as lightweight composite shell, superior comfort and fit, ultra-high quality intercom systems, noise reducing ear protections, soft ear cups combined with ultra-thin and powerful speakers, advanced styling and of course, optimal protection.

RALLY

The new HP10 Rally incorporates the advanced technology of our HP7 state-of-the-art Advanced Helmets in a sleek and modern design that provides the ultimate performance open-face rally helmet. Featuring an ultra-lightweight carbon shell combined with a Fast Removable Half Chin Bar (HCB), adjustable carbon fiber peak, brand new adjustable and integrated sunscreen, highly comfortable professional fit combined with outstanding sound-insulation, HP10 Rally is the new reference for rally drivers and co-drivers looking for the ultimate product. Our helmet R&D engineers worked day and night with sound engineers and top rally drivers to deliver a helmet that would set new standards! No effort was spared to obtain outstanding performances of sound insulation and communication efficiency, incorporating ZeroNoise® electronics, high power speakers and noise cancelling microphone, and to deliver the best experience in terms of safety, comfort and communication.

- Open face helmet featuring ultra-lightweight FIA8860-2018 Advanced full carbon shell

- Fast Removable Carbon Half Chin Bar (HCB) quickly and easily detachable to ensure fast access to breathing ways without the need to remove the helmet in case of emergency

- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance

- Adjustable carbon sun peak

- Adjustable integrated anti-scratch sunscreen: ML Red mirror (M10) fitted as original equipment + dark smoked (M10) supplied in the box

- Removable cheek pads with multi densities advanced materials for optimal comfort

- Flexible yet sound insulating integrated ear muffs for comfort combined with sound insulation

- ZeroNoise® electronics, high power (yet lightweight) speakers and adjustable efficient noise cancelling microphone integrated in Half Chin Bar

- Ultra-reliable heavy duty In-Molded Female Nexus

- Connector (compatible with other brands of amplifiers)

- Detachable right side-cover for smooth integration of the Female Nexus Connector

- Flat right side carbon cover supplied in the box, for those who prefer using a straight cable coming out of the helmet instead of the integrated connector

- Air extraction holes to maximize cooling

- Factory installed Hans anchors as original equipment

- HP helmet bag included

- Interior: Dark Grey High Strength - High Comfort FR Fabric

- Alternative interior fabric colors: Tan, White, Red, Purple, Blue, Green, Neon Yellow, Pink and Orange (on special order)

- Adjustable sunscreens available as accessories in various colors to ensure optimal visual comfort

- Color: Carbon, Matte finish

- Sizes: 54-55-56-57-58-59-60-61-61+

- Homologation: FIA8860-2018

- Ultra-reliable heavy duty In-Molded Female Nexus Connector (compatible with other brands of amplifiers)

ADJUSTABLE SUNSCREEN

HP HELMET BAG
INCLUDED

MANUFACTURER: BELL RACING HELMETS
MODEL: HP10 RALLY
HOM. NO: AH.015.20-0
FIA STANDARD: 8860-2018

FLAT RIGHT SIDE
CARBON COVER
INCLUDED

EARCUPS SPACER FOAM

Foam Spacers can be positioned behind the soft earcups to obtain the right level of pressure and insulation.

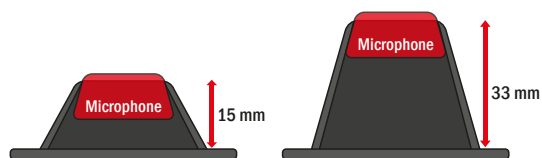

The kit with thicknesses (10 mm) is included in the box.

ADJUSTABLE MICROPHONE

The adjustable microphone pieces with different sizes allow a perfect fit of the microphone right in front of the mouth.

We include two kits with different thicknesses in the box. 15 mm and 33 mm.

HALF CHIN BAR EMERGENCY FAST REMOVAL

The HP10 Rally, Mag-10 Rally Carbon and Mag-10 Rally Pro feature an innovative and unique patented system, allowing to disconnect the half chin bar from the helmet very easily and quickly, without the use of any tools. In case of accident, this unique feature allows the doctors and paramedics to immediately access the breathing ways of an injured driver, without having to remove the helmet.

Simply lift the tab, and unscrew the tool-less red screw; once the screw is undone after a few turns, gently pull the half chin bar and that's it!

FLAT SIDE COVER

Ultimate connection flexibility: The HP10 Rally, Mag-10 Rally Carbon and Mag-10 Rally Pro are delivered with a side cover integrating the Nexus female connector. For those wanting the connector hanging on a loose cable, the connector side cover can easily be replaced with a flat cover. Flat right side cover supplied in the box.

FOCUS ON

HP6 RALLY, GT6 RALLY CARBON, GT6 RALLY PRO

Incorporating technology used in our state-of-the-art HP7 Advanced Helmets, the HP6 Rally provides the ultimate in closed-face rally helmet performance with its modern and aggressive design, featuring a wide eyeport for extended vision, ultra-lightweight Advanced carbon shell. The HP6 Rally integrates the latest technology from ZeroNoise including advanced electronics, high power speakers and noise canceling microphone to assure outstanding performance, sound insulation and communication efficiency.

Karting is a very demanding discipline in a sometimes difficult environment. All our karting helmets are directly derived from our Formula One helmets and benefit from their key characteristics adapted to karting thanks to our collaboration with the best drivers: lightweight products, great comfort, exceptional ventilation and aerodynamics and unequalled defogging system to deliver no less than the ultimate protection and the ultimate performance.

THE BEST KARTING DRIVERS WEAR BELL

CARBON

PRO

KARTING

Purpose-built for the hard-charging kart racer, the RS7-K Carbon is the karting-only version (non-fire retardant, extra durable interior) of the RS7 series. Based on the HP7 design and featuring a lightweight carbon composite shell, the RS7-K Carbon uses an innovative shell and shield design enhancing aerodynamic performance and energy absorbing capacities. The sleek, modern design features an advanced ventilation system, double screen anti-fog (DSAF) shield and a rubber gasket seal ensuring that water does not enter the eyeport in rain conditions.

- Ultra-lightweight Premium Carbon Composite shell
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) 3MM visor for anti-fog control and superior visibility
- Powerful and effective top and chin bar ventilation system with 14 air intake and extraction channels for maximum ventilation
- Air intake system includes two-part centre and side air intakes (installed)
- Shell and shield design optimized to improve aerodynamic performance, reduce internal noise and enhance energy management capacities
- Rear spoiler available separately
- RS7-K Carbon is NOT compatible with FHR anchor systems or devices
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Shield and pivot kit: SE07 3MM, SV(SE07)
- Interior: Non-fireproof lining for extra durability
- Black High Strength - High Comfort Fabric and synthetic leather
- Alternative interior fabric colors: Tan, White, Red, Purple, Blue, Green, Neon Yellow, Pink and Orange (on special order)
- Color: Carbon, Gloss finish
- Sizes: 54-55-56-57-58-59-60-61-61+

KC7-CMR CARBON

1205001 to 1205006

950,00 €

SIZES: 54 TO 59

Bell continues to innovate with the KC7 CMR Carbon, the first ultra-lightweight carbon youth karting helmet. Based on the advanced HP7 and incorporating the same carbon composite technology, this sleek, aerodynamic design features an advanced ventilation system with 14 air intake and extraction channels designed to maximize cooling and a double screen anti-fog (DSAF) insert to prevent fogging in rain conditions. Certified to the FIA/Snell CMR standard designed for karting drivers under the age of 18, the KC7 CMR Carbon is a winning choice for the next generation of champion drivers.

- Ultra-lightweight Premium Carbon Composite shell: 1,095g in sizes 54 to 56 and 1,130g in sizes 57 to 59 (+ or - 3%)
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) 2MM visor for anti-fog control and superior visibility
- Powerful and effective top and chin bar ventilation system with 14 air intake and extraction channels for maximum ventilation
- Air intake system includes two-part centre and side air intakes (installed)
- Shell and shield design optimized to improve aerodynamic performance, reduce internal noise and enhance energy management capacities
- Rear spoiler available separately
- KC7 Carbon is NOT compatible with FHR anchor systems or devices
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Shield and pivot kit: SE07 2MM, SV(SE07) (This shield only fit the KC7 Range)
- Interior: Non-fireproof lining for extra durability
- Black High Strength - High Comfort Fabric and synthetic leather
- Alternative interior fabric colors: Tan, White, Red, Purple, Blue, Green, Neon Yellow, Pink and Orange (on special order)
- Color: Carbon, Gloss finish
- Sizes: 54-55-56-57-58-59
- Homologation: SNELL-FIA CMR-2016

DISCOVER THE GRAPHIC AND COLOR OPTIONS

Purpose-built for the hard-charging kart racer, the RS7-K is the karting-only version (non-fire retardant, extra durable interior) of the RS7 series. Based on the HP7 design and featuring a lightweight composite shell, the RS7-K uses an innovative shell and shield design enhancing aerodynamic performance and energy absorbing capacities. The sleek, modern design features an advanced ventilation system, double screen anti-fog (DSAF) visor and a rubber gasket seal ensuring that water does not enter the eye opening in rain conditions.

- Carbon fiberglass Composite shell
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) 3MM visor for anti-fog control and superior visibility
- Powerful and effective top and chin bar ventilation system with 14 air intake and extraction channels for maximum ventilation
- Air intake system and rear spoiler available separately
- Shell and shield design optimized to improve aerodynamic performance, reduce internal noise and enhance energy management capacities
- RS7-K is NOT compatible with FHR anchor systems or devices
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Shield and pivot kit: SE07 3MM, SV(SE07)
- Interior: Non-fireproof lining for extra durability
- Black High Strength – High Comfort Fabric and synthetic leather
- Color: White
- Available as well with exciting and trendy Graphics and Glossy finish:
 - o Stamina White/Blue
 - o Stamina Yellow
- Sizes: S-M-L-XL
- Homologation: SNELL K2020

BELL HELMETS

The KC7 CMR is a lightweight youth karting helmet based on the F1 proven HP7 design platform. The sleek, aerodynamic design features an advanced ventilation system that can be used with or without air-intakes to maximize cooling and a double screen anti-fog (DSAF) visor to eliminate fogging. Homologated to the Snell/FIA CMR standard and certified for global competition, the KC7 is designed to minimize helmet weight for karting drivers under the age of 18 and perfect for the next generation of champions as they start their racing career in karting.

- Lightweight Carbon Fiberglass Composite shell: 1,185g in sized 52 to 56 and 1,230g in sizes 57 to 59 (+ or - 3%)
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) 2MM visor for anti-fog control and superior visibility
- Powerful and effective top and chin bar ventilation system with 14 air intake and extraction channels for maximum ventilation
- Shell and shield design optimized to improve aerodynamic performance, reduce internal noise and enhance energy management capacities
- Rear spoiler available separately
- KC7 is NOT compatible with FHR anchor systems or devices
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Shield and pivot kit: SE07 2MM, SV(SE07) (This shield only fit the KC7 Range)
- Interior: Non-fireproof lining for extra durability
- Black High Strength - High Comfort Fabric and synthetic leather
- Color: White
- Available as well with exciting and trendy
- Graphics and Glossy finish:
 - o Champion Blue
 - o Champion Green
 - o Champion Orange
 - o Champion Pink
- Sizes: 52-53-54-55-56-57-58-59 (52-53 not available with Graphics)
- Homologation: SNELL-FIA CMR-2016

LEWIS HAMILTON

Bell Racing teamed up with F1 World Champion Lewis Hamilton to develop special editions of the KC7 CMR. Lewis worked with Bell's in-house designers and custom paint team to create a custom graphic for the KC7 CMR with the signature elements and colors of his F1 helmet. This special editions KC7 CMR feature a multi-layer red SE07 2mm visor, clear top and side air intakes, clear rear spoiler and HP helmet bag.

- Same characteristics as KC7-CMR with attractive colour design
 - Clear Top and side Air intakes already mounted on the helmet
 - Rear spoiler already mounted on the helmet
 - Light ML Red shield Installed (SE07 2MM) on LH 2019
 - Light ML Purple shield Installed (SE07 2MM) on LH 2020
 - HP helmet bag included
- Available in 3 special editions:
- LH 2019 White/Red Design
 - LH 2020 Black/Purple Design
 - LH 2020 White/Purple Design
- Sizes: 54-55-56-57-58-59
Homologation: SNELL-FIA CMR-2016

SERIOUS HEAD PROTECTION

Bell invented the motorsport helmet in 1954 and significantly upgraded the design with the addition of expanded polystyrene (EPS) foam a couple years later.

One of the first open face Bell helmets, the 500-TX, is selected by the Museum of Modern Art in New York for Excellence of Design.

The 500-TX was the first helmet to receive Snell approval and would set a standard for product safety.

In 1966, Bell launched the world's first full-face motorsports helmet and quickly earned the admiration and support of the world's top motorsport racers and enthusiasts.

Many famous drivers such as Jacky Ickx, Jackie Stewart, Niki Lauda, Gilles Villeneuve and many others have all worn the Bell Star to protect their head in the seventies.

Fast-forwards 50-odd years and Bell is again launching the 500-TX Classic and the Star Classic to the delight of true classic car enthusiasts and historic car drivers.

The same shape as the famous original Bell Helmets are reintroduced but produced to the last safety standard (FIA 8859/SNELL SA2020) using the latest production techniques and high tech materials.

MAGLOCK

Inspired by the dust and heat of Baja, Maglock Air is a revolutionary way to connect racers helmets to their forced air systems. At the heart of this innovation, a machined magnet creates a solid, air tight sealed bond between air hose and helmet using 30 lbs of magnetic tensile force. Solid enough to endure the roughest rides, the connection can be easily broken by a single hand and small amount of pressure when disconnecting from an oblique angle for a "quick-release" extraction. Designed for fast driver changes and quick exit from a racing vehicle, Maglock is the latest innovation in racing safety and performance.

DRINKING TUBE KITS

The integrated drink tube kit includes flexible tubing, L shaped adaptor to properly position the mouth bite valve and a one-way valve for drinking systems. This allows for seamless integration without modifying the face piece or drilling holes in the helmet chin bar (bite valve and drinking system not included).

The new drinking tube has the same features as the standard drinking tube and incorporates a new quick connect valve that allows one-handed connection and disconnection.

FACTORY CUSTOM PAINTING SERVICE

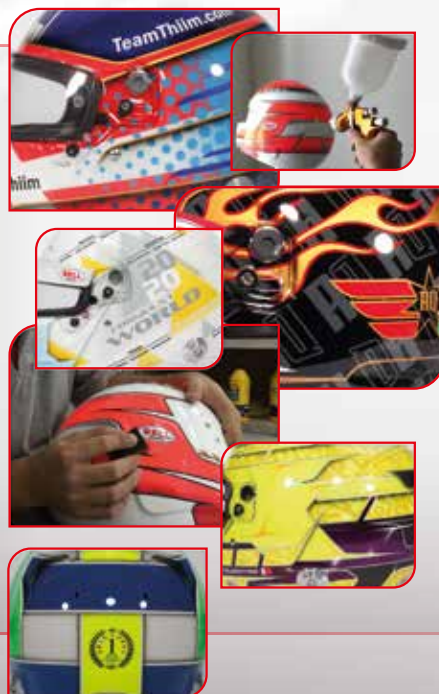

Bell Racing offers factory custom painting with the guarantee that the painting will not affect the original protective qualities of the helmet. Each painted helmet comes with an official certificate, proving its conformity with the FIA safety regulations.

Our experience over the past years in painting the helmets of F1 and other professional drivers enables us to reproduce almost every possible design and colours.

HOW TO FIT A HELMET
1. POSITIONING THE HELMET ON YOUR HEAD

Put the helmet on by grasping the chin strap halves in each hand and pull the helmet on over your head.

2. FITTING THE HELMET

When properly positioned, the helmet should be worn low on the brow eyes, near the center of the eye opening, touching the top of the head with uniform and firm pressure all around - tight without excessive pressure points.

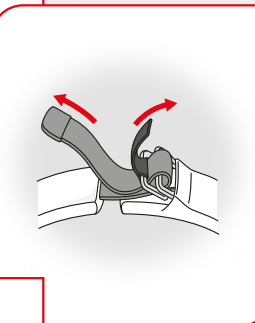

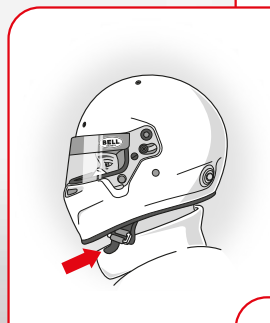

To fasten the chin strap, thread the end of the strap through both d-rings, loop the strap end back through the inner d-ring and pull it comfortably tight against the throat. Make sure the chin strap is snug against the throat.

⚠ WARNING CORRECTLY USING THE CHIN STRAP

A good fit and a properly fastened chin strap are all that keep the helmet on your head during an accident. Make sure the chin strap is correctly fastened and pulled snugly up against your throat each time you wear your helmet.

3. CHECKING THE FIT

Correctly position the helmet on your head and stand in front of a mirror. Gently rotate the helmet first from left to right and then from front to back. If the skin on your brow moves with the helmet as it is rotated, the fit is proper. If the skin on your brow does not move when the helmet is rotated in either direction, the fit is too loose. Try various sizes until you find one that fits correctly. With the helmet properly positioned, and the chin strap fastened, try to remove the helmet from your head. Grasp it securely and make a serious effort to roll it off your head in both the forward and backward directions. If you can remove the helmet or are able to roll the helmet backward far enough to expose your forehead or forward far enough to block your vision, the helmet either fits too loosely or the straps are not properly adjusted.

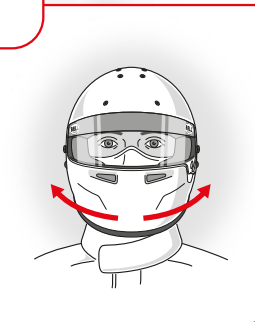

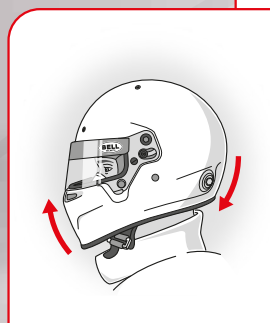

If the helmet is too large or if you can still remove the helmet, DO NOT use it and replace with a smaller size.

Repeat steps 1 through 3

If you cannot remove the helmet and it does not roll either backward far enough to expose your forehead or forward far enough to block your vision, you have a proper fit. We recommend fitting the helmet with a head sock or balaclava if you intend to wear one in competition.

4. TEST DRIVE

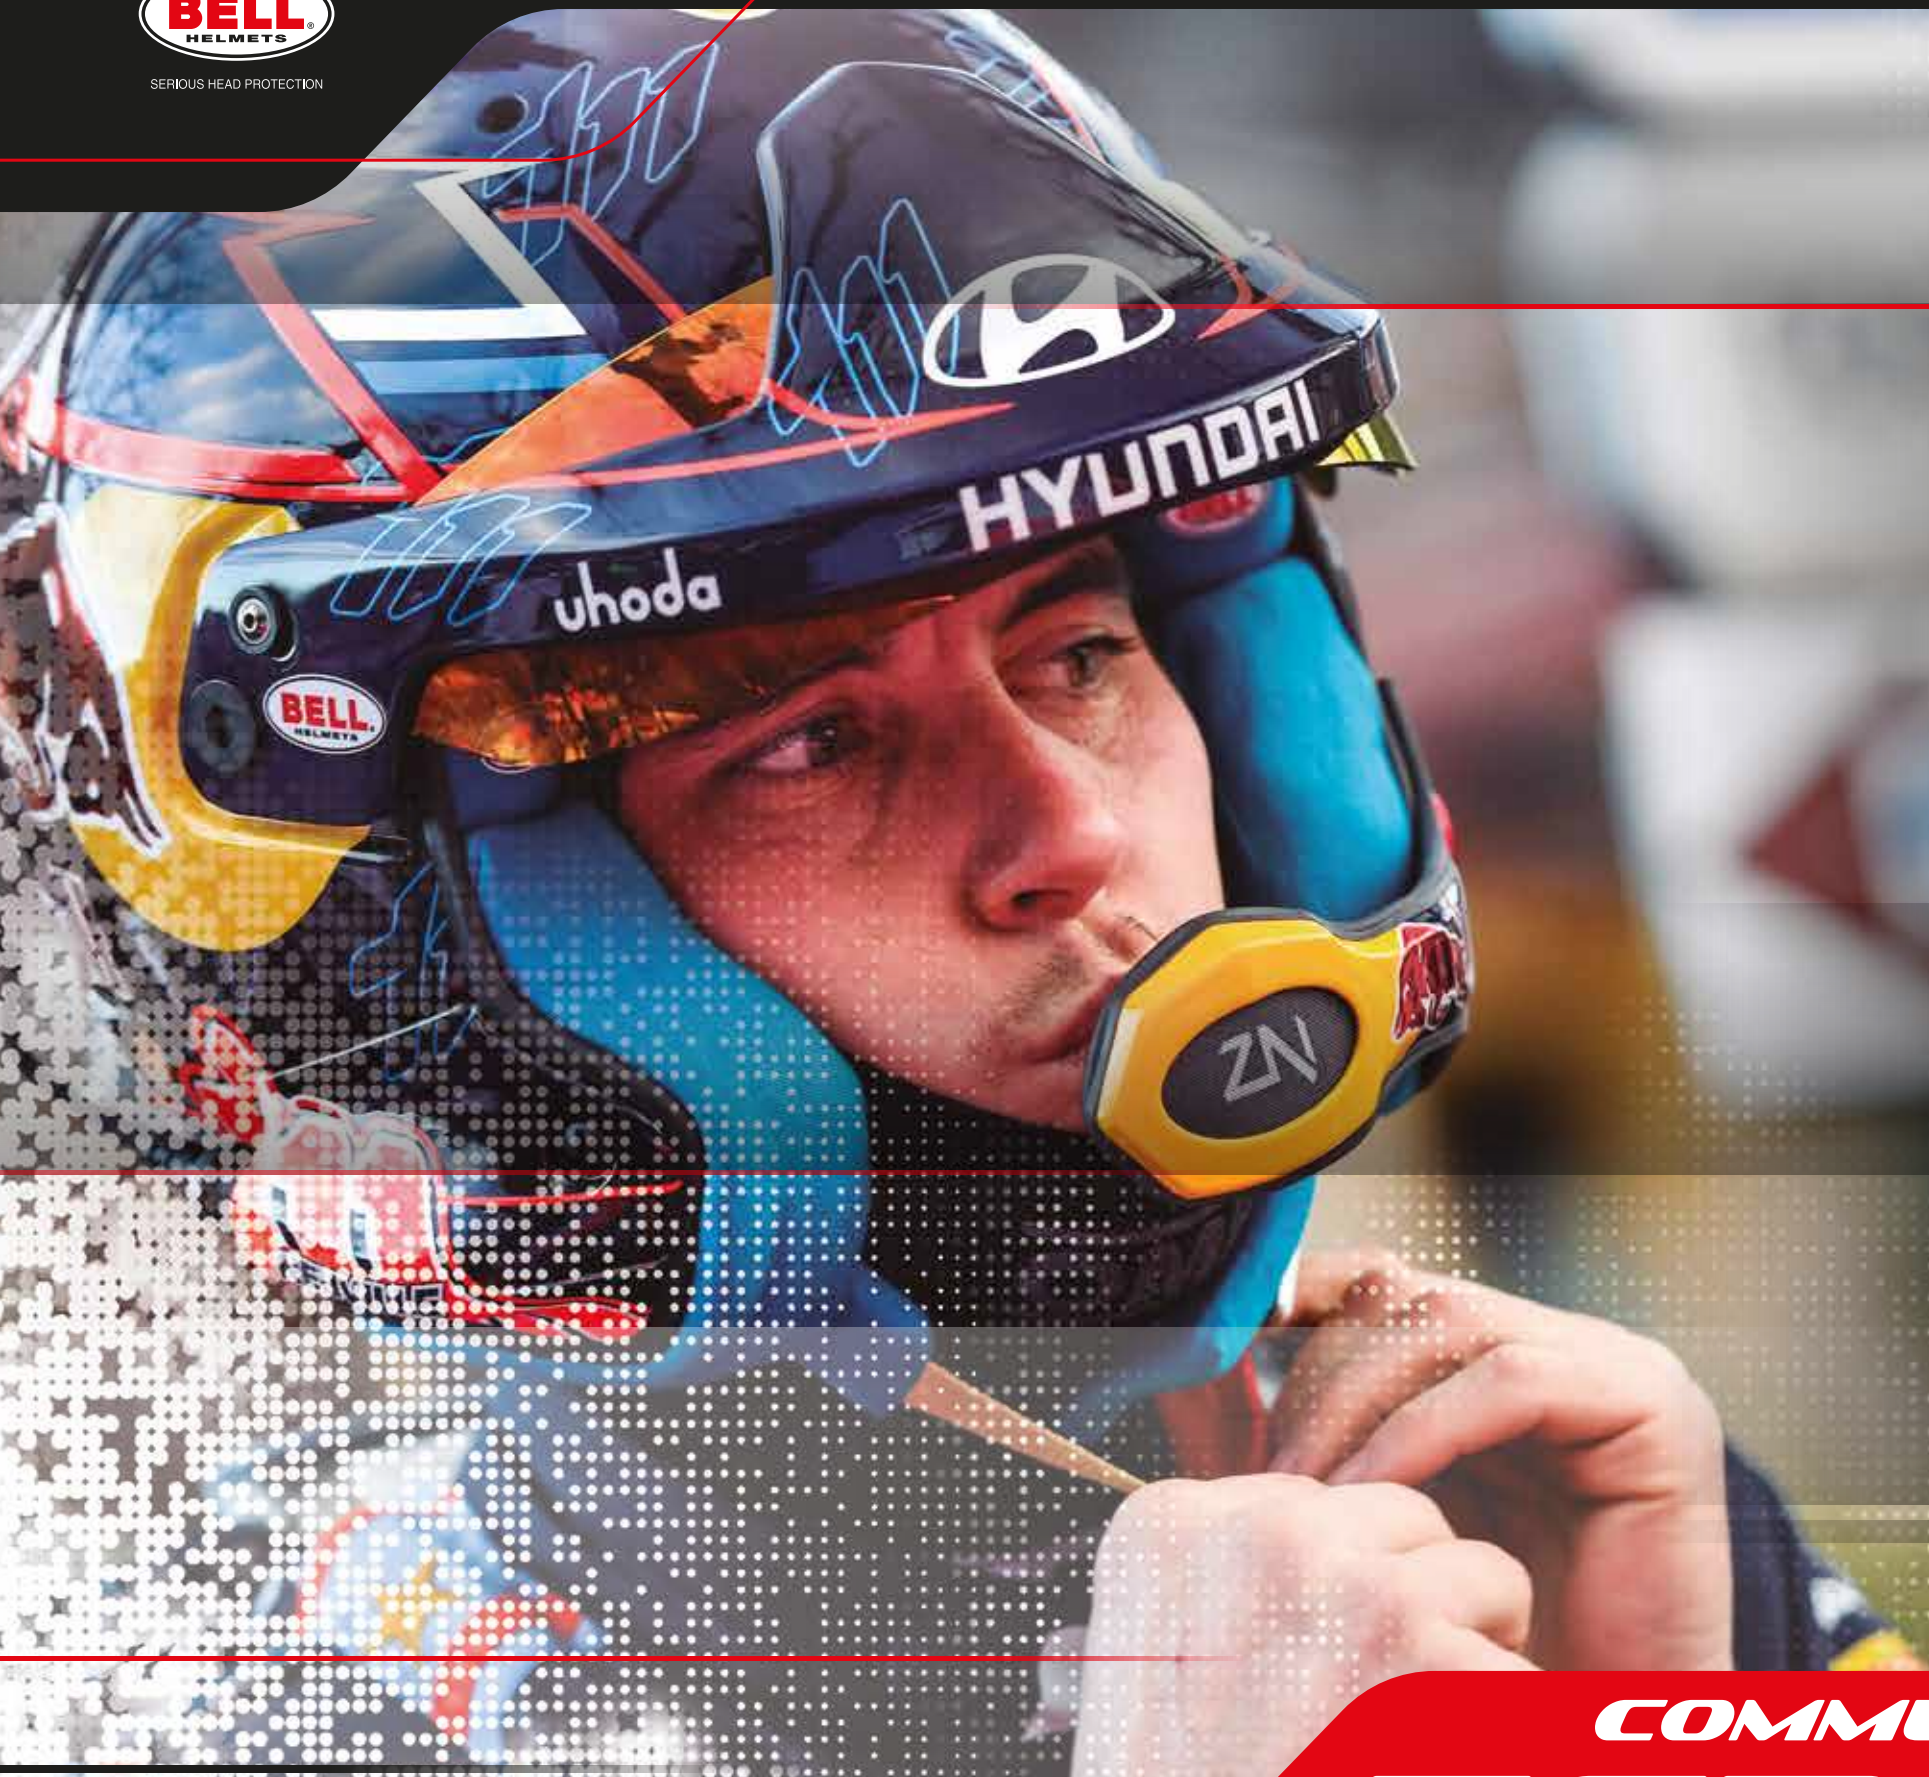

Steps 1 through 3 are critical to getting the most out of your helmet. Spend as much time as necessary to satisfy yourself that you have a good fit. Only after successfully completing steps 1 through 3, put on your helmet and wear it for an extended period or take a test drive. If the helmet feels comfortable, remaining firmly in place and the straps remained properly adjusted, your helmet is ready to use. If the helmet feels uncomfortable or moves excessively, go through steps 1 through 3 as necessary to correct the problem. If you are unable to successfully complete all 3 steps, or if the helmet does not fit and feel comfortable, DO NOT continue to use the helmet. Either: Return to the dealer for assistance, or contact Bell Racing for further instructions.

Do not use chin cups or wear the strap on the point of the chin. This will increase the risk of the helmet coming off in an accident.

SERIOUS HEAD PROTECTION

ZN

ZERONoise

Zeronoise features the most advanced communication systems in WRC, with an adaptive sound technology that is able to deal with any car, surface and driver's preference. This technology translates into a full product range of intercom and full integration with Bell and OMP helmets.

The combination of OMP, Bell and ZN delivers top performances thanks to a full R&D integration that also led to a breakthrough innovation today known as the Driver's Eye, the smallest camera in the world for live TV broadcasting, integrated inside the helmet and FIA homologated.

COMMUNICATION DEVICES

ZERONoise

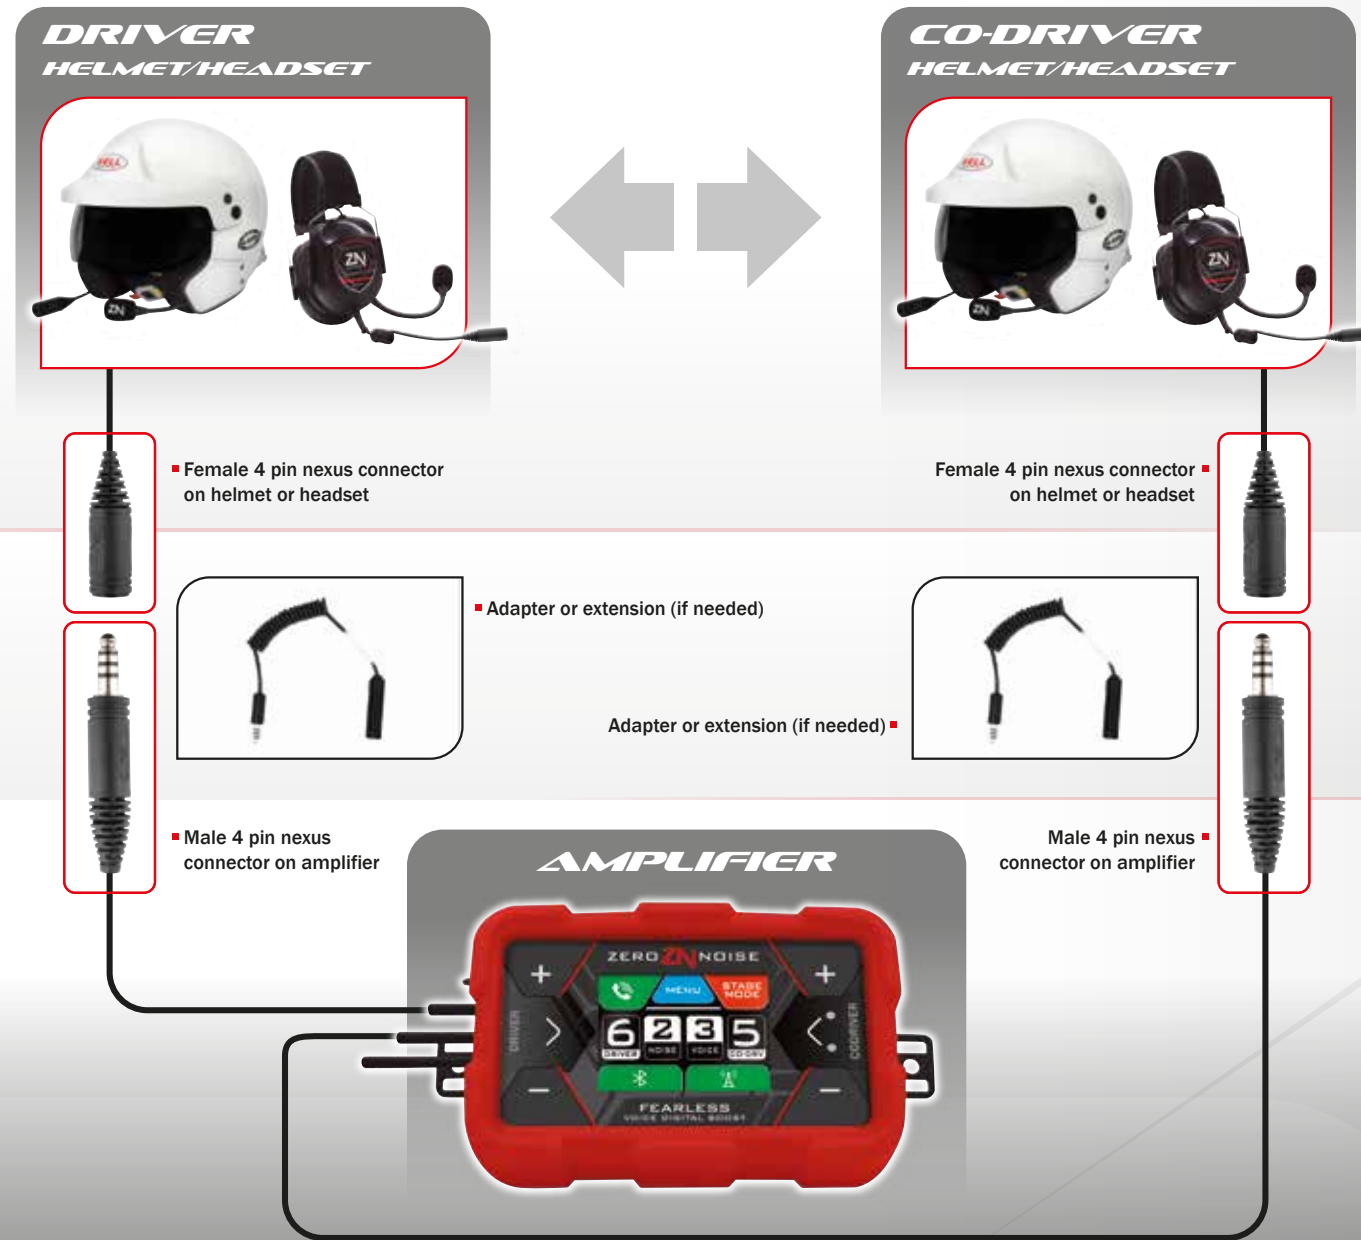

The Rally communication systems support communication between driver and co-driver with extensive power and noise canceling. It also allows radio connection, Bluetooth connection, as well as camera car.

COMPONENTS

- Amplifiers
- Headsets
- Helmet radio kits
- Extensions and adaptors (if needed for different connector systems, e.g. components produced by other manufacturers)

SYSTEM ARCHITECTURE

Male 4 pin nexus connector on amplifier, female 4 pin nexus connector on helmet or headset.

Communication between the car and the pit is enabled with a standard phone call, through a professional intercom system connected via bluetooth to the smartphone. PIT LINK allows you to connect up to two people in the car to the pit, as well as more cars and more people at the pit by using the conference call function of the smartphone.

COMPONENTS

- Pit link GSM amplifier
- Helmet radio kits
- Headsets for driver or co driver
- Extensions and adaptors (if needed for different connector systems, e.g. components produced by other manufacturers)
- Pit Link headset for the pit crew
- PTT button for call

SYSTEM ARCHITECTURE

Female 4 pin nexus connector on amplifier, male 4 pin nexus connector on helmet or headset.

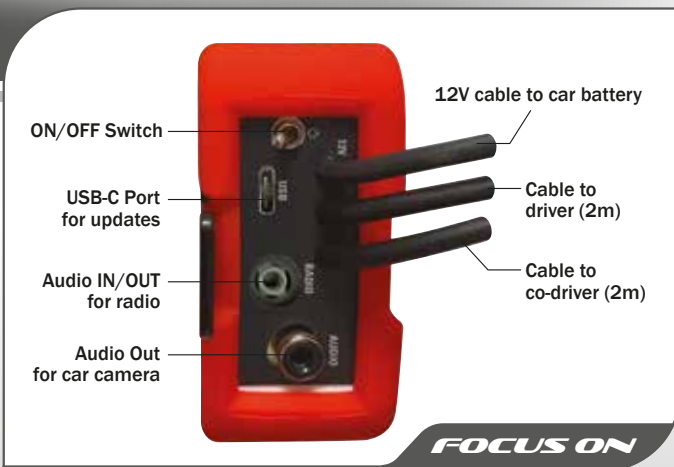

FEARLESS is the ZERONOISE DIGITAL amplifier at its third release after further development in 2021 with an unprecedented adaptive noise cancelling and sound comfort. Electronic, look, and usability, make it the finest digital intercom in the market. A state of the art digital processor performs the active noise cancelling and further sound settings are available. The display in combination with the multifunction buttons, makes FEARLESS intuitive to use. FEARLESS' modern design is enhanced by the anti shock and anti vibration silicon cover. It is compatible with any helmet intercom kit with Nexus connectors, although the system delivers best performances with the ZERONOISE intercom kit range. It is fully compatible with all ZERONOISE INTERCOMS KIT/HEADSET.

- Digital active noise filtering
- Multifunction touch display (It works with gloves)
- Bluetooth
- Anti shock, anti vibration silicon cover
- USB-C Port
- Audio Out for car camera
- Audio IN/OUT radio connection
- Dual volume adjustment
- 12V Filtered power cable
- Easy fix system on roll bar or dashboard
- Available with three different connectors:
 - o Male 4 PIN Nexus
 - o Female 4 PIN Nexus

INTREPID is the ZERONOISE professional analog amplifier that provides more sound comfort and efficiency. The electronics have been completely re-engineered to deliver a state of the art sound quality thanks to the new amplification and noise filters. The result is clear voice and minimum background noise. It also comes with a central switch to select three noise filters. INTREPID's modern design is enhanced by the anti shock and anti vibration silicon cover. It is compatible with any helmet intercom kit with Nexus connectors, although the system delivers best performances with the ZERONOISE intercom kit range. It is fully compatible with all ZERONOISE INTERCOM KITS/HEADSETS.

- Three professional noise filters
- Efficient amplification for long battery life
- Anti shock, anti vibration silicon cover
- Audio Out for car camera
- Dual volume adjustment
- ON/OFF led light
- 9V Internal battery
- 12V Filtered power cable

VALIANT is the entry level analog amplifier of ZERONOISE. It is easy to use, solid and straightforward, a good choice for amateurs and beginners. It is powered by the internal 9v battery, or the 12v power cable that connects VALIANT directly to the car battery. It also features 6.35mm connectors and car camera RCA socket for audio output.

NEW

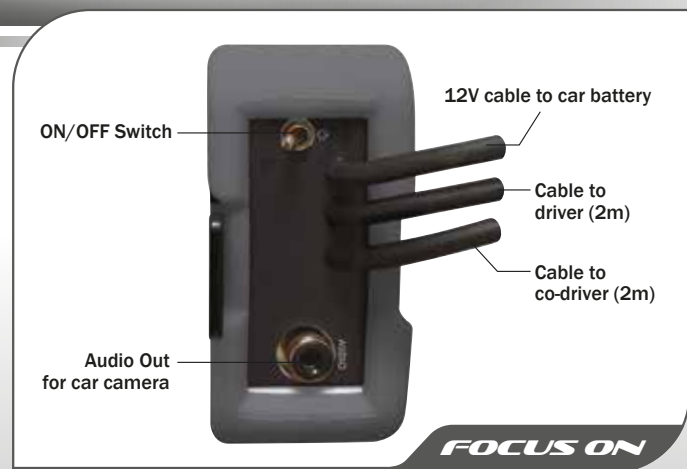

- Analog noise filter
- Efficient amplification for long battery life
- Anti shock, anti vibration silicon cover
- Dual volume adjustment
- ON/OFF led light
- Audio Out for car camera
- 9V Internal battery and 12V power cable
- Easy fix system on roll bar or dashboard
- 6.35mm Stereo Connectors

FIXING BRACKET

Female 6.35mm Stereo connectors

FOCUS ON

Heavy duty silicone cover anti shock and anti vibration. Available in smooth or rugged version.

SPARE PARTS

REPLACEMENT TIPS 6400019

6,00 €

Replacement foam tips for earplugs.

RADIO ADAPTORS 6400018

86,00 €

Radio cable ADP equipped with PTT button and connection to UHF/VHF radio. Made to order. Radio adaptors are custom made depending on the radio brand and model.

SOUND FILTER 6400017

40,00 €

12V Power Filter works between the intercom and the 12V power source. It filters audio signal and minimises interferences.

KARTING COMM SYSTEM

WEARABLE AMPLIFIER

6100031

158,00 €

PIT-LINK TRAINER is the micro amplifier designed to be the perfect communication tool for karting.

PIT-LINK TRAINER is a Bluetooth Digital Amplifier that allows to communicate with the pit during a training session. You can wear it around your neck and keep it inside your suit. The digital noise cancelling makes the communication smooth by compressing the noise around the driver.

Communication is automatically on when the phone call is incoming. No need to press anything. The pit crew will connect to the driver through a normal phone call. PIT-LINK TRAINER requires PIT-LINK MICROPHONE KIT and PIT-LINK EARPLUGS to be setup in the helmet.

SPECIAL FOR KARTING

- Micro Amplifier
- Super Fast Bluetooth
- Advanced Noise cancelling
- USB Port (Type C) for recharging
- Independent volume
- Long life rechargeable Internal battery

EARPLUGS KIT

6300021

158,00 €

- Earplugs with smartphone male jack 3.5mm connector.
- Spare set of Super Soft Foam Tips.
- Metal case.

USB-C MICROPHONE KIT

6300026

131,00 €

- Radio helmet kit for full face helmet - USB-C connector for pit-link trainer.
- With 3.5mm stereo connector for earplugs.

HEADSET

6200005 to 6200007

252,00 € to 350,00 €

- Professional Headset with Noise cancelling
- Microphone Jack 3.5mm connector for smartphone.
- PTT Button
